BRITAIN SEEKS NEW MARKETS FOR ITS COAL

Overproduction in Ruhr Has Caused Accumulation of 10,000,000 Tons

GERMANS ENDEAVOR TO LOWER RAIL COSTS

Export of British Coal in 1924 Drops 18,000,000 Tons, Compared With Year Before

Special from Monitor Bureau LONDON, May 11-An intensive search for new markets for the sale of British coal is foreshadowed by events in Germany, where an accu-mulation of more than 10,000,000 tons of coal, for which there is no present market, has led the German coal producers to seek reduced rail

and Baltic ports.
In 1913 Germany bought 9,000,000 British coal in 1924, compared

Germany Uses Less Coal There has been a considerable de-

of great benefit to the general economic situation of the country, although they may temporarily cause a setback to the coal industry. These are the large water-power develop- the price of the visa in accordance tive letter. ment which has taken place in Ger-many, and the success which has been achieved in finding uses for the low-grade heating substances, such as lighte. For instance, in Berlin, the electric light and power plant is operated with lighte fuel, while for domestic heating, lighte briquettes have found a wide market.

At the present time, the German center for the import of British coal

center for the import of British coal is at Hamburg, and the transportation charge is only 8s. a ton. German coal must now pay 11s. for the 200-mile haul from the Ruhr. If the reduction in rates now asked from the German railways should be granted, it is expected that all coal used in Germany will soon be supplied by that country's mines. Private Subsidization

Meanwhile, German mine owners re taking active steps to encourage the consumption of German coal in er ways. The syndicate in which all the mine owners are united now levies a private tax of 1.50 marks on each ton of coal sold. The pro-ceeds are used mainly to recoup mines which do not succeed in selling all their entput, and partly to stimulate sales in the foreign market by paying exporters the difference between cost prices and for-eign selling prices. It amounts to a

British coal mine owners, howernment is affording the greatest possible co-operation to these efforts, which consist in part of laboratory experiments in attempting to find ways of utilizing low-grade coals for the production of fuel oil, coke and various by-products by low temperature carbonization methods. It is also planned to effect great economies and to make possible a cheaper of coal in power plants directly at the pit mouth, instead of by power plants located in centers of con-sumption, something along the lines of the super-power system which has recently been outlined for the industrial sections of the American Atlantic seaboard.

MR. MAX TO FORM CABINET BRUSSELS, May 23 (AP)-The King oday asked Burgomaster Max of Vyvere, which resigned yesterday. M. laz agreed to attempt to form a manded. temporary business ministry, unaffliated with any parliamentary politi-

RIFFIANS STAND GROUND FIRMLY

Strong Resistance Shown to Gen. de Chambrun's Forces in the Moroccan Zone

RABAT, French Morocco, May 23 (AP)-The Riffian tribesmen are standing ground stoutly against the forces seeking to oust them from the French zone, and, although Gen. Count de Chambrun's success in Thursday's and Friday's operations is unquestioned. Abd-el-Krim and his followers still loom as formidable

quarters here say the Riffians have shown themselves to be thoroughly organized along the lines developed in the Great War, and that the brun's operations captured the positions only by bayonet charges.

private subsidization of export, and really operates in practice as the public aubsidy to industry now being widely discussed in England would do.

Charges.

The situation has been greatly improved by a brilliant operation in the central sector under the direction of de Chambrun. The operation, and the control of the co the object of which was to reliev the region of the upper Ouergha valever, are taking energetic measures to find means of offsetting any loss of foreign markets. The British Gov-ley, was participated in by two French columns supported by artil-ley and aviation. lery and aviation.

These forces advanced against re sistance from the Riffians who were other numerous contingents which hurried from the northeast and counter-attacked. The rebels were put to flight, according to the official French communiqué, and one tribe Krim by the Moorish leader himself electrical current by the utilization is reported to have submitted to the

Painleve to Stand or Fall

By Special Cable PARIS, May 23-A total of 30,-000,000 francs in supplementary credits is what the Government means to demand for the Moroccan operations. This is much lower than Brussels to form a cabinet to sucthe figures hitherto mentioned, but ceed that of Premier Aloys van de obviously, if the hostilities are prolonged, further credits must be de-

> Paul Painlevé intends to stand or regarding Moroccan affairs. He will tries furnish the backbone of the demand an instant discussion. The industrial life of the communities Socialists appear to have put themselves in a most embarrassing situation, for they have pronounced definitely against the operations and only take the place of the branch may be obliged to vote against the Government.

It is certain, in that case, that the Nationalists will vote for the Government with the Radicals. This will be what the French call an alternative majority and plainly the public division, but the Socialists have committed themselves too positively and are ranged with the Com-

Edouard Herriot, on the other hand, who was thought to be on the side of the Socialists, has flatly proclaimed his solidarity with M. Pain-levé. The preparations for the combat were made under his ministry by General Nollet, and Marshal Lyautey in a letter personally testifies to the sympathy and assistance M. Painlevé. Naturally this makes a powerful argument for M. Painlevé against those who accuse him of im-

perialistic designs. Some alarm, nevertheless, is felt at the arrangements which Louis Malvy is rumored to have made in Madrid. That he should have reached an agreement by which Spain will raise difficulties if the French should, in the course of fighting, cross the indeterminate line which is the fron- State has been lowcred this year

Mr. Hughes Would Help Miners Fight Injunction

Wheeling, W. Va., May 23 HARLES EVANS HUGHES, formerly Secretary of State, has offered his services to the United Mine Workers of America in fighting a temporary injunction granted by Judge William E. Baker in United States District Court here in which "peaceful per-suasion" methods in unionization are forbidden, T. C. Townsend attorney of Charleston, chief of West Virginia counsel for the union, said in a statement here. Mr. Townsend declared that the miners regarded the new restraining order as "emslavement of the human mlod," in which view Mr.

Hughes concurred, he said.

ANNUAL DEFICIT

Admiral Palmer Reporting Balance of Trade Declared \$28,000,000 Loss Sees Economy in Private Ownership

Special from Monitor Bureau WASHINGTON, May 23-In one of the frankest discussions of the American Merchant Marine since the war. Admiral Leigh C. Palmer, president of the Emergency Fleet Corpober of Commerce yesterday that the Government is operating its emer gency fleet at an annual deficit of \$28,000,000, that although this represents a reduction in the original deficit there is still slight hope of making the federal fleet self-supporting and that full efficiency is impossible under government management. Even if the fleet is sold to private

de sejour imposed on visitors aver-age 3 francs daily. In Paris there ued, the higher American marine operators, Admiral Palmer contincosts resulting from higher wages and a higher American standard of living, will make future subsidies or changes in American sea laws necespessimistic but simply a frank facing of economic facts, which the Nation itself must take, Admiral Palmer said that the alternative to unpopular shipping subsidies in the future will be to let foreign nations build Americain ships.

> Should Abandon Field Some foreign nations can build ships 25 per cent cheaper than can her custom. America, he said. He implied that America should abandon this field to its competitors, but that it should change its laws to permit American lines to buy and operate such ships

after they are built under the Amer-"It is plain that a private owner can do many things to secure business that a government operator cannot do. In short, the Government should dispose of its fleet to private ownership as soon as possible without sacrificing the national interests. not merely for the sake of the direct economies which would result, but for the far more important purpose

an efficient and permanent basis." Two Kinds of Handicaps There are two kinds of handicaps, he said, from which American ships suffer, "tangible differentials," and "intangible differentials." The first are "higher fixed charges." The second arise from "inefficiency of operation resulting from America's being a newcomer in the shipping field. They are expressed in lack of traffic agencies at home and abroad, the lack of advantageous trade conditions nd in an unestablished reputation. The "intangible differentials," Admiral Palmer said, will diminish

Claims to be Disputed COPENHAGEN, Denmark, May 23 (AP)-Peter Freucren, Danish polar explorer, commenting yesterday on King Haakon's authorization to Capt. Roald Amundsen to take possession of any land discovered in the course of his present North Polar Expedition, said he considered it highly improbable that there is any land

Besides, he added, Canada long ago annexed any land discovered northward of the Dominion, while Peary gave the North Pole to the United States. Thus, he declared, any Norwegian claims would probably be disputed.

HOLLAND ASSURED OF 1928 OLYMPIAD

By Special Cable

THE HAGUE, May 23-The Am sterdam municipality has voted 500. 000 florins for the 1928 Olympiad and is willing to extend further financial help if necessary. This and other important donations and guarantees make practically certain that Holland will be able to act as hosgroup, the judges awarded Mr. Bur-rage the Lindley Gold Medal of the in London, Mr. Burrage's exhibit was tess in 1928.

The American millionaire, William Wrigley, fresh from arranging for ing gum factory in Germany, and at present staying here, gave 10,000 florins for the same purpose.

LORD PLUMER CONGRATULATED

JERUSALEM, May 23-Upon rebeen Baron Bruno Schroeder, Sir George Holford and Sir Jeremian Colman, all very prominent in horticultural circles.

It is interesting to note that this is the second medal given by the Boston man, the society's Gold Medal having been awarded him at the great exhibition of the American Orchid Society in Boston last year.

It is learned from Mr. Burrage ists.

It is said by Mr. Burrage that this exhibit of American wild flowers in London was made a part of his work for the preservation and the perpointed High Commissioner in Palestine, succeeding Sir Herbert Samuel, the Zionist executive yesterday cabled through the Colonial Office its learned from Mr. Burrage has already transplanted and established in New England many large colonies of native Orchids.

JERUSALEM, May 23—Upon receiving the announcement that Fleid Marshal Lord Plumer had been appointed High Commissioner in Palestine, succeeding Sir Herbert Samuel, the Zionist executive yesterday cabled through the Colonial Office its winder ecomposity of fruitful progress under your administration. The Washington Administration.

AMERICA FIXES ITS POLICY FOR FUNDING DEBTS

Government Is Determined Chief Debtors Must Shortly **Enter Into Agreements**

PRESIDENT'S VIEWS BRIEFLY SUMMARIZED

Periodical Jogging of Memories" to Be Adopted If Found Necessary

By FREDERIC WILLIAM WILE WASHINGTON, May 23-America's policy for funding the European war debts is now fixed in a number of essential respects. It is now possible to clarify the situation, from the Coolidge Administration's standpoint, and to remove misapprehen-sions that have grown up both in the United States and Europe as the result of the conflicting reports re-

cently in circulation. Perhaps the outstanding decision to which the American Government has committed itself is the determination that our principal debtors must conclude funding agreements before next December. The administration is anxious to present the Six-ty-ninth Congress with tangible results in that direction. President Coolidge hopes to make such results the outstanding feature of his first message to the incoming Congress. It is in the hands of the Senate and House that the matter of the \$12,000,000,000 of war debts

Temper of Congress

The World War Foreign Debt Commission is empowered to negotiate funding settlements, but they are not valid until Congress ratifies them. The temper of Congress about the debts is well known. It flared up in the closing days of the last session. President Coolidge is aware that if he is compelled to tell the next Congress that the European debt business is merely drifting from bad to worse, explosions on Capitol Hill are inevitable.

The mere suggestion of Etienne Clementel, former French Finance Minister, that the French \$4,210,000,000 debt was not being carried on France's books as a real liability, evoked a storm in Congress which come, if funding action is continuously delayed.

The United States Government's debt program can be authoritatively summarized as follows:

1. There will be no drifting. Representations already made through our diplomatic channels in debtor capitals will be followed up. There will be no undignified prodding, but there will be such periodical jogging of memories as may be required. This applies to all of our debtors all the irrespective of the amounts. allke, irrespective of the amounts

German Reparations Question

2. France. Italy, Belgium and all others concerned have been given to understand that under no circumstances will the United States consent to fund the debts in connection with German reparations payments. France and others can do their bookkeeping in their own way and propose certain schemes of payment to the United States, but the latter will not consent to become involved, directly or indirectly, with reparations. Reparations are one thing, and the money owing us by allied powers is entirely another thing. America will insist that they be kept wholly apart.

3. The Coolidge Administration will conduct funding negotiations in Washington and nowhere else. If proposals are made that we send commissions to Europe or let Europe deal with our diplomatic representatives there, such proposals will be rejected. German Reparations Question

rejected.
4. At least two governments. Italy and Belgium, which owe us, respectively \$2,138,000,000 and \$480,500,000, desire to await our funding settlement with France before comsettlement with France before com-ing to terms with us. These gov-ernments have been informed that such a suggestion does not meet with American approval. Our pol-icy is to deal with each debtor na-tion entirely indexes.

Capacity to Pay

5. The United States, in accordsage to Congress on Dec. 3, 1924, will insist upon the right to fund European debts on the basis of

capacity to pay.

Mr. Coolidge's exact words were,
"Terms and conditions may have to
conform to differences in the financial abilities of the countries con-At the outset of negotiations

with any debtor nation, it will be in-formed that cancellation of its obli-gations to the United States Treasury, either in part or in whole, is not a debatable question. It is not generally known in the

United States that a whole series of Inter-Allied debt settlements has been going on in Europe during the past year or two. Some of the smaller nations like Rumania, Czechoslovakia and Jugoslavia have been liquidating so-called post-war "relief credits" to countries like Great Britain, France and Italy. There have also been settlements, in part or in whole, of war loans to the larger European governments

"Relief Credit" Payments

It is the knowledge that these transactions have been completed that fired the Coolidge Administration with the determination not to let Uncle Sam hold the bag indefinitely. While these "relief credita" payments, running into millions of

Advice on Farm Business

At the morning session of the Chamber, William M. Jardine, Secretary of Agriculture, warned the business men that the American farmer "will insist on running his own business," and that "if farmers generally decide that co-operative marketing is the best practice for them, they will carry out their plans regardless of any opposition that may arise from other elements in the population. Any individual who tries to stem the tide of agricultural prog-

Mr. Hoover Deplores Waste At last night's session, Herbert Hoover, Secretary of Commerce, spoke as a business man, talking frankly about waste in Government

Continuing, he said, in part:

The Shipping Board—to cite a glaring case—was originally created as a body to regulate rates and abolish discrimination in ocean-going traffic. These are semijudicial functions that quite properly were entrusted to a board. Political jeal-ousies and sectional jealousies, however required a bineritan body. ever, required a bipartisan body se-lected from different parts of the country, although it was to perform an expert judicial function. Then

an expert judicial function. Then this structure was suddenly loaded with the most difficult of administrative jobs—the actual construction and operation of the greatest single merchant fleet in history.

The losses and waste which have resulted from this blunder of assigning administrative functions to the joint and equal minds of a wrongly constructed semi-judicial body have amounted to perhaps a few hundred millions out of the three billions we have lost on shipping, but beyond this the impossibility of continuous policies has worked great losses upon our priworked great losses upon our privately owned merchant marine. Nor can we properly blame the individual members of the Shipping Board. Not even two geniuses of equal authority could administer a competitive business let alone se

Competitive business let alone seven.

There are other breeds of this same sort of confusion between individual and joint responsibility. The Federal Board for Vocational Education, the Federal Power Commission and other agencies are mixed advisory and administrative functions.

Under existing hodge podge arrangement, the citizen is driven from pillar to post among the bureaus, seeking information he wants, settling the demands upon him or determining the regulations by which he is required to conduct his business. I have daily evidence in the Demartment of Commerce of all these Department of Commerce of all these

The change will affect only the present Talbot subscribers. The new equipment is located in the telephone company's building at 175 Adams Street, where the Columbia machine switching central office is located. The latter was placed in operation in November, 1924.

Talbot will be the seventh machine

switching central office in Boston. Machine switching offices have also been placed in operation in Provi-dence and in Lawrence.

QUINCY PARADE ARRANGED

QUINCY, Mass., May 23—Henry L. Kincaide, chief marshal of Quincy's three hundredth anniversary parade on Saturday, June 13, announces that it will start on Hancock Street at Billings Road at 2:30 o'clock. The parade will consist of five divisions: The military, under Brig.-Gen. Alfred F. Foote; the civic, under Lieut.-Col. Fred E. Jones; the school children, under Maj. Nathaniel S. Hunting; the floats, under Joseph W. Poweil, and the trades, under Ensign Carl R. Sheppard. Lieut.-Col. George Adams will be chief of staff.

GOVERNOR GIVES PRIZE

BRITISHOUTLINE ELECTRIC PLAN

Government Hopes Scheme to Aid in Meeting the Unemployed Problem

By Cable from Monitor Bureau LONDON. May 23 — The British Cabinet is considering the expert committee's report upon the proposed national electricity scheme the main recommendations of which are expected to be adopted—a pronounce-ment upon this subject is to be, made next month when parliament. reassembles after the Whitsuntide

The generating works, however, are to remain in the hands of private companies, so that the whole may be run upon a commercial basis. The state loans to render this possible are to be gradually repaid, thereby enabling the scheme to become eventually self-supporting.

The Government relies largely upon this electricity scheme, supplemented by the state-aided cheapen-ing of the production of liquid fuel from coal, to meet the unemployment problem. It has thus decided against embarking either upon Sir Alfred Mond's scheme for using the unemployed relief dole to subsidize wages, or upon that advocated by the Labor Party for endowing a special committee with a state income of £10,-000,000 annually to start fresh enterprises.

Speaking for the Government at Birmingham last night, Sir Arthur, GOVERNOR GIVES PRIZE Steel-Maitland, Minister of Labor, Governor Fuller has donated to characterized Sir Alfred Mond's the Italian-American Athletic Asso-ciation of Quincy a silver shield, to be given as first prize in the Ter-centenary Marathon, to be held in the House of Commons last night connection with the celebration next in the form of a bill which was remonth of the three hundredth anni- jected decisively by a large Govern-

Conference of Governors to Have Picturesque Setting

Meeting Place at Poland Springs, Me., Is a Spacious

P)-If the governors of many states who are to gather here for their annual conference from June 28 to July discuss the problem of good roads. as they have at some of their previ-ous conferences, they will find an ex-cellent text in the highways of this section of Maine. In fact, as it is probable that a large proportion of them will enter the State by automobile, this is likely to be the first feature of the Maine landscape to

impress them.

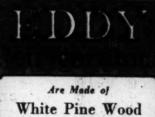

A number of the state and interstate roads pass within a short distance of Poland Springs. Doubtless Governor Brewster will point out to his guests with especial pride the splendid concrete road running from Portland to Augusta and opening up the route to the Belgrade Lakes. A smoth tar surfaced highway runs near here on the route from Portand to the White Mountains. In this vicinity also are several other excelor tarred, forming parts of continuous motor routes from southern Maine to other sections.

The governors will find their meeting place a spacious hilltop with wide prospects on every side. The view from the front of their hotel is westward across a glassy slope to a lake in the valley, and thence over Retail prices of fish, milk, butter, lake in the valley, and thence over the hills to the Presidential Range of the White Mountains over the bor der in New Hampshire. On the slope is a well-groomed golf course. A short distance below the summit is hundred members of companies 1 and 2, Governor's Footguard of the big spring which has been owned by the Ricker family since the old homestead, now forming a part of Hartford and New Haven, and 300 of the Richmond Blues, which have just the hotels on the hill, was built in completed a joint celebration here 1795. PERMITS ISSUED

All but Two of About Fifty

Applicants Are Granted

Certificates by Board

MONTPELIER, Vt., May 23 (Spe-

cial)-The Vermont Public Service

Commission has made public its find-

ings and orders in regard to the ap-

plications for permits to operate

motor busses and motor trucks.

Hearings were held in each individual case of about 50 applicants, and

all but two of them were granted

the public good certificates for

which they made application.

The commission withheld notice of

its finding until all the cases had been carefully gone over, consider-

ing the transportation problem as a whole for the State, and taking into

consideration the steam and electric

railway companies, as well as the

Competition Restricted

Competition is restricted to a cer-

tain extent by the orders issued,

which compel truck operators tak-

ing indiscriminately all freight that

is offered for trasportation between

fixed termini to charge a rate that is

at least equal to the freight rate on

steam railroads, plus a reasonable

charge for cartage from the station

To protect the fast disappearing

trolley lines, of which only five re-

main in the whole state of Vermont, the commission ordered that through

busses should not take local passen-

gers between points served by trol-

ley lines. There were two very marked examples in which the growth

of motor bus transportation has led

Permission Refused

The commission has authority

granted by the new law to fix sched

ules as well as rates and routes. Several of the certificates to motor

bus operators were granted on con-

dition that their time of departure

shall not be within a certain speci-

COOLIDGE SUMMER VISIT TO BE QUIET

Home Enjoyment Is Goal of Swampscott Stay

Genuine home enjoyment, com-parative withdrawal from the press of official circumstance is the aim of President and Mrs. Coolidge in seek ing the North Shore and White Court in Swampscott as a summe residence this year, according to Ralph S. Bauer of Lynn, who with Mrs. Bauer, has been visiting at the White House for a few days.

Mr. Bauer made it very plain that unless the President and Mrs. Coolidge realized their wish for quiet and reasonable seclusion at White Court after June 26, the date for their arrival from Washington, their stay there might be materially shortened. The demands upon the President and his wife in Washington are such, Mr. Bauer said, that the Chief Executive insists that opportunity to prepare for the activi-ties of the fall and winter shall not

be interfered with.
Frank W. Stearns and Mrs. Stearns are due to return from Europe next Tuesday. The will land in New York and the White House is preparing to welcome them and afterward plans will be completed for the summer vacation at Swampscott where the President and Mr. Stearns will be neighbors.

HAWTHORNE STATUE FUNDS TO BE SOUGHT

SALEM, Mass., May 23 (Special)-A life-sized bronze memorial statue of Nathaniel Hawthorne is proposed for a site on Hawthorne boulevard by the Hawthorne Memorial Association, Inc., to which end a subscription campaign will be circulated the first two weeks in June. The society has already raised \$10,051.34, and it is desired to increase this fund to

Hawthorne spent many years in the immediate vicinity of the site of the proposed statue. Nearby is the house in which he was born, and a short distance down Derby Street is the dignified old Custom House where he served as surveyor. On Mall Street, off the Salem Common, is the house in which he wrote "The Scarlet Letter."

MOTOR CLUB TOUR SCHEDULED A large committee of the Boston Motor Club headed by John J. Watson, chairman of the runs and tours committee, is preparing for the Sutton, N. H., from June 17 to June

Music News of the World

The Music of Jacques Ibert

"Groupe des Six" might lead one to believe that all the hopes in young F. ench music are held within the limits of this small group. But it is However interesting and varied these young artists may be, however great even their progress may have been of late, they are not the only figures that deserve to draw and hold the attention of those who are not only interested in French music, but also in the movement of music generally. Several young composers of the present day hold out more than promises and one of them, whose name is not entirely unknown merits our warmest sympathy by reason of the quality of his work: his name is Jacques Ibert.

First of all, and contrary to what usually takes place in our times, when the name of a composer begins troduced to a child, for he is over is now understood, when, to be really young, one must have only just left off playing marbles.

Won Prix de Rome

what is of still greater monot a child, but he succeeded in obtaining the highest academic musical songs, "La Verdure Mouilée" on That ought to be enough, it would seem, to turn away from such a comfor "le Jardinier de Samos," a poser the boldest champion of youth; comedy by Charles Vildrac and and yet it is amongst the boldest, finally one of his finest productions, and the most uncompromising even, which possibly contributed most, tothat Jacques Ibert finds his supportthat Jacques Ibert finds his support-ers and best friends. I have heard name known and to earn admiration

Yet there is nobody more modest, some duties at the Admiralty. During the knowledge of orchestral renearly five years, this musician had sources and the easy and safe hanto undergo the strain and risks of the war in the northernmost parts of is not repugnant to the power and flights of true sentiment. This is tinued to live within himself and endeavored, as best he could, to enlarge bis musical knowledge. When rehis musical knowledge. When restored to private life, he resumed his sons at the Conservatoire of Paris and he had the good fortune of carry-ing off the Grand Prix de Rome, in 1919, at one stroke—a very exceptional result which might have "swelled the head" of a young artist less convinced of the vanity of rewards and less passionately fond of usic itself. He went to spend two rules attached to the Grand Prix, but in such an historical atmosphere he did not listen only to the counsels of the past. He already possessed a per-sonality well sustained by the works of his time and very keen on what is new, and this comparative retirement

irony, of eagerness and humor, a kind olas II and not by the Soviets). of blend between modest tenderness and a most delicate shyness. This appears in his works, so soon as we hear them. His peculiar irony found the "envois" which every holder of the Grand Prix is bound to send during the period of his raised at the "exhibition" of the 19th, the ing the period of his scholarship, grave and perhaps mournful compositions customarily, he did not fear sending a one-act piece, "Persée et Andromède," the classical title of which must not lead to any illusion, for the work is not inspired by any the text, full of smiling sensitiveness and cutting irony, which is to be found in Jules Laforgue's "Moralités Légendaires."

The venerable members of the "Institute," accustomed to "envois" of an austere and rather pompous descrip-tion, were non-plussed by a musician who did not hesitate to put in his hero's mouth one of the most sar-castic "tyroliennes." The personages of the antique legend, brought to life again by Jules Laforgue's parodic sensitiveness, express them-selves in this production in a mu-Leighton House, Thursday June 11,8:15

Paris, May 3

THE stir which has been made in sical language quite in accord with found in a "Chant" for choir and the poet's refined intentions: they orchestra which is to be performed size evidence of the same precision shortly. But at the same time, there France and even in certain circles abroad by young composers ated with the same inspiration and irony and, owing to this and to the who formed, in Paris, some little the same ingenious and scholarly what was called the boyishness, in the musician as in the poet. It is to be hoped that some theater will soon give us a perform- in the expression of his sensitiveness ance of this charming work, where the three characters, Perseus, Andro- melody, which are not to be met meda and the Monster, are symphonically described and speak musically with a most fascinating swing.

Symphonic Compositions

how to blend in his temperament qualities which, if not opposed, are at least difficult to hold together: a fastidious precision with an easy melodic inspiration, and incisive ments, so as to make the most efficairony with sentimental enjoyment.

lade de la Geôle de Reading," after Oscar Wilde's work, and "Escales," to loom, we are not in this case in- particularly the latter, have just 30 and therefore he is not "young" by concert-goers. "Escales" is undoubtedly one of the most interesting symphonic pieces brought out for the last four or five years. Besides these three works-and many others which Jacques Ibert wrote to try his powers and which he does not want to ment, this new composer not only is publish—he brought out a few pieces distinction that can be given in Tristan Derème's poems, a suite for France; the Grand Prix de Rome. the flute, clarionet, trumpet, violin

more reserved and more aloof from the petty caucuses of musical politics those who understand best the craft of their art. In this connection, almusical studies before the war and though in a totally different style, itself.

fastidious precision of his style, he would come nearer to Ravel than to anyone else, but with less reserve and a natural inclination toward with so often in the author of "La

This work alone would suffice to a special study of singing and the prove how well Jacques Ibert knows resources and limitations of the voice. He thinks rightly that a composer's duty is to study the possivoice, just as he studies the possibilities and impossibilities of instrucious and the most happily unexpected use of them in the orchestra.

Stage Work to Be Expected Owing to this attention to singing and his very fine appreciation of the musical genius as well as to his exsense of movement, Jacques Ibert must quite naturally be led to write for the theater and possibly to realize music, permit the voices, as well as the orchestra, to express themselves big effects, and be for our times of truth and justice. And, since the what "Le Nozze di Figaro" and "Il first contact of Stravinsky with our Barbière di Seviglia" were for another period.

To tell the truth, it is not the only road I can see open before this young composer; symphonic music and chamber music may expect a great deal from him, but it seems to me his praises from the lips of Arthur for him; "Movements," two pieces deal from him, but it seems to me Honegger, Georges Auric and Ro- for two flutes, clarionet and bassoon, that he is now one of the two or Honeger, Georges Auric and Rolond-Manuel themselves and also a most wonderfully balanced composers of the previous generation in which the classical and the most modern aspects of music are musical stage the dignity and entered to the musical sta eration—amongst others, Maurice most modern aspects of music are Ravel and Albert Roussel.

Yet there is nobody more modest, Jacques Ibert is certainly among absent, and to satisfy both the just

A Quality Action Means a Quality Piano

The most vital part of any piano is the piano action. Your purchase of a piano, player or reproducing piano will bring lasting satisfaction if you insist upon the Wessell, Nickel & Gross piano action. For you will find this famous action only in instruments of established

The Wessell, Nickel & Gross piano action is built by the oldest, largest and leading maker of piano actions in the world. It is the highest priced action built today. Look for the octagonal trade-mark.

WESSELL, NICKEL & GROSS

Established 1874 New York

familiar instance or two, take, first, the climax of the triumphant scene in the second act of 'Alda.' How often I have seen the triumphant Radames take the wreath presented to him by the princess, and instead of putting it on, as all laws of ceremony would require, merely throw it down and step to the footlights and begin to sing! Take, for another example, the scene in 'Madame Butterfly.' in which the two Japanese

In spite of these faults the concert of April 19 was of immense interest. Especially following a rather dull which representatives of various orchestral season, from which new branches of musical activity might arrange to direct their labors toward cartain common and a provider to the control of t excluded, this listening brought a he expressed a desire that heads of little relief to the ears of those who conservatories and officials of the Stravinsky has for a long time late methods by which the teaching of music could be related to the prac-

won much sympathy from the Italian tical performance of it. public. This race of rugged pioneers, whom long centuries of struggle and nisery have strengthened rather than in the United States who could stand weakened, prefer dynamism, rhythm up before a conference and state in and melodic clearness to the elegant authoritative detail - the fogs of impressionism. In French which he thus hinted at; for if there music its only real affections are for is anybody who has seen the work Debussy first and then Ravel. It is ings of American musical education not possible for the Italian public to on the one hand, and of American accept an inconsistent or diffuse musical production, on the other, and work, even if it contains excellent has pondered them with serious and qualities. It often happens that our disinterested care, it is he. When I public is impatient or even badly say American musical production, I behaved, but this—apart from temought to put especial emphasis on peramental reasons—is the outcome American opera production, of which of the too exclusively theatrical I consider him the profoundest stuof the too exclusively theatrical habits which they acquired during 100 years, and which they are only now beginning to get out of. But in general their verdicts-violent and impulsive though they may bewithout commonplaces and without always contain a striking proportion of truth and justice. And, since the public, it has been easy to see that sympathy existed between the master and his hearers. This is precisely why the delinquency of concert societies in general, and of the Augusteo in particular, in that which concerns the spreading of Stravinsky's music, is so much more deplorable, and it is to be hoped that

it will soon be remedied. Long Ovations

Long ovations greeted "L'Oiseau de Feu" and "Petrouchka," such ovations as no foreign composer has of the established opera of New reaped at the Augusteo since the York seem to me to be altogether at reaped at the Augusteo since the coming of Debussy in 1913. And even the Concerto-which is an austere set forth in his announcements of a composition and difficult for most year ago. people to understand-obtained a say that the performance of the com-poser was singularly impressive in its flerce acuteness, and in its rhyth-

mical, wild, imposing "Martélement." The orchestral performance—ex-cept in the Concerto, which necessimarkable.

ous sincerity that he loved his amongst the bamboos with regal leisure, erect, graceful, imperious tershire, clothes, better than his London ones. From this book, it is evi- what a delicate yet profound study dent that his predecessor in office, of a like attitude, is never happier than crowd, whether social or political,

bog and bypath." These papers, written as far back in some cases as 1918, were intended, as their author modestly explains, to fill a corner in ephemeral sheets. They have been collected in book form, to satisfy the importunity of friends, who found in them that which deserved some measure of permanence. It is well for the reader permanence. It is well for the reader to remember this fact, as he turns the pages. And the politician, pother than actual might well take tential or actual, might well take majority of Mr. Ramsay MacDonald's readers, be their views in accordance or at variance with his own, political opinions or allusions, thrusting their way in, irrelevant and disconnected, will be the one jarring note in themes otherwise interesting and delightful.

A Happy Traveler

How happy he is, this traveler, whether he be climbing the road from Callender to Loch Katrine,, with the great Ben Ledi before him, its majestic head lost in the mist, or mounting upward toward Ben Macdhui through pinewoods and heather, as at home out there upon the moors by night as by day, with a granite bowlder for a tent and the brittle stalks of heather for a bed. And for University. a little while, with this Scotsman who knows and loves every turn of the road, leagues away from newspapers and platforms, we are allowed to forget that he is also the member for Aberavon and the leader of the Labor Party.

But how frequently there is some incident, trivial or important, to reintroduce the party politician. The memory of Botha, the sight of Tory M. P.'s, on the wing or in their own domains, the vision of their stately houses, any hint of capitalism in the ascendency, or democracy on the down-wing, and our genial pedestrian in his holiday clothes is back

The Historical Foundations of the Law Relating to Trade-Marks, by trian in his holiday clothes is back

Columbia University Press. \$6. in the atmosphere of Carmelite Street and Westminster. Then, whether it be on Scottish moor or skirting the Isles of Greece, whether in the land of the Pharaohs or amidst the hills of Judah, blue waters or forgotten in the discourse on those Marxian arguments so dear to the Daily Herald, and we learn once vanguard for the salvation of man-kind.

Problems of the East "I still hold," we read, "that the Egyptian problem is the simplest of all." But that was written in 1922, before the author had talked with Zaghlul Pasha in Downing Street; he probably would have said something a little different in 1924. And apparently the Palestine problem appeared hardly less simple to this ardent internationalist, who concluded that Lord Balfour did not know what he was talking about, and that his "pledges to the Jews were of the same worthless character as Mr. Bonar Law's to the miners." Everywhere capitalism seemed to be rearing its ugly head; everywhere were the evidences of the sins and follies of the Great War and its subsequent Treaty of Peace, and what are these phenomena at any time to a member of the I. L. P. but an opportunity for scornful invective?

Valuable Interludes

Nevertheless, we get some valuable interludes. The capitalist and the imperialist are forgotten, and we are artist who knows admirably how to portray it; we mix among men and women of all races and castes with a lover of his kind whose insight and humor quicken our sympathy and captivate our imagination. How de-lightful are the short papers on

Honolulu—"the most absurd place in the world. It is a top-hat in the top-hat in t Wanderings and Excursions, by J. Honolulu—"the most absurd place Ramsay MacDonald. A Journalist's Reflections

The Pablic Life, by J. A. Spender.
Two vols. London: Cassell, 30s. net.

ITHOUT the journalist, public life would be private—
and today, impossible. If it
were by chance possible it would be
dangerous. So the journalist is in a

the vacor.

His judgments of Lloyd George,
Northcliffe, Chamberiain are not unfair. He holds the scales steadily,
and while he does not disguise his
own beliefs, he respects those of his
opponents. Here and there a deliciously light touch is woven into
the texture of what is necessarily a
serious, but never a solemn or porsense both the author and the recor- serious, but never a solemn or portentously heavy thesis. Here is Glad-stone's code about what disclosures were permissible:

If he wrote a letter with no mark on it, the recipient might presume that it was intended for publication. It it was marked "private" it might be shown to any one but not pub-lished; if it was marked "confiden-tial" it might be shown to colleagues and not withheld from wives; if it was marked "secret" it was not to be shown to wives.

The Press and the Public

The most important chapter in the book is that entitled "The Press and the Public Life." Journalism has changed enormously since Mr. Spender's early days. His account of the change and his warnings of its dangers are the best thing yet done on this subject. He generates no heat; but he sheds a clear light on a vital public matter.

His brief but suggestive excursion into the realm of international politics results in an admirably clear picture of the influence of the press on foreign politics, and the difficulthat influence. He also has some valuable things to say on American politics.

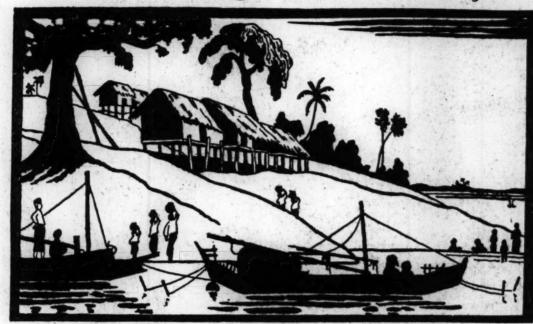

editorial chair. He has fewer counterparts in that exciting and exacting rôle than some of us would like. But there is no man who cares for the public life-and none of us can be dissociated from it-for whom these two volumes are not a sane, conhas moved close to the heart of stant, and quiet affirmation of the value of his noblest promptings.

Heyer (Boston: Small, Maynard & Co. \$2), dating far back to the fifenjoys. Experience and observation, of the historic romance from the a keen, scrutinizing intellect and a title to the last very exciting moments. The phenomenal rise of Simon, self-styled Beauvallet (because his father was Malvallet) has the earmarks of the legendary hero of that remote age, beginning an un-known vagabond and emerging, through his own grit, as the king's right-hand man. In today's novel the He writes of politics and the course would be from office boy to presidency of a steel trust—but how much more fascinating is the former, ties, has served no master but his with its dark castles, bristling forests, clanking armor, sworn fealties bublic good.

to consideration

The Muse in Council, by John Drink-whether he is a minor poet or a sort of poetry that he writes. No major poet, so far as his ability to poet asks a critic to subscribe to his analyze poetry is concerned, for the own particular convictions, but with-

R. DRINKWATER says the chief concern of criticism ought to be, not to tell what intimate account of a little known a writer says, but to tell how well he says it: not with the argument. every taste, stories grave, stories gay but with the manner of presenting the argument. Yet it is impossible to and stories—a few— almost brutal in their frankness. Special emphasis is laid on the fact that the book is "lightly written," but there is much without telling something of what he says, and in the instance of "The food for thought to be found in its Muse in Council," at any rate, Mr. pages as well as much entertain-Drinkwater has presented his arguments so well that it is almost imment, and the author's illustrations cannot fail to prove most exhilaratpossible to resist repeating them.

In brief, Mr. Drinkwater defines poetry, expounds the relation between poetry and morals, tells what he thinks of free verse, and analyzes the work of several poets, old and new. As the essays run in the book. they are divided into three groups, "Theories," "Ancient Altars," and "Modern Instances." They were not written consecutively, and in many cases, not recently, but were first given off as lectures, occasional papers and reviews during 15 years. In spite of this, they are strikingly consistent in adhering to Mr. Drink-

water's premise, namely, that poetry is experience presented in a com-pelling fashion. Intensity and individuality of experience, he thinks, is the only source of a poet's material, his opinion.

Make us think that he has changed known in England), for Housman, his opinion. and when a poet braces himself to the act of reducing his experience to clear-cut and shapely form, he has created a poem. It is this union of intense experience (which presup-poses emotion) with resolute intelli-gence that is the essence of Mr. Drinkwater's interpretation of poetry n general and in particular.

Purpose Accomplished Many will not agree. But "my anxiety is not for agreement," he says, "but to leave such readers as is not to tell us that our particular will take this book as a whole with some clear impression of what I conceive poetry to be and what its unction among us."

If that is his chief anxiety, he need not be anxious. He has ac-complished his purpose. If a reader happens to be a writer of free verse he certainly will not agree, but no one can raise a question about the clearness of Mr. Drinkwater's conceptions. That is a satisfaction because many of us who are not poets have often wished that we could a little better understand what poets mean when they write about their

Some of those who disagree with Mr. Drinkwater in his theories of poetry have asked who he is that he should speak as an oracle, and have declared that he is only a minor et after all, albeit one of the best of them. It makes no difference

Sail-boats

(White Bear Lake)

J. M.

Written for The Christian Science Monit Sail-boats are butterflies With forgotten wings.

Sometime I shall tune a poem It will be a thin blue song With scarlet edges. They will hear this.

And with remembered wings, From wooded shores There will be a fluttering, a waving of butterfly handkerchiefs— Thanking me.

Flora Lawrence Myers.

Round About Shottery

The trees in spring are always ready with their welcome. This warm welcome expressed in their lovely tenderness, makes a profound human appeal. They are, I think, most beautiful when they are arrayed in the gold and amber of new leaflets. Who could ever forget Joyce Kilmer's incomparable poem.

I think that I shall never see A poem lovely as a tree:

I think that I shall never see A poem lovely as a tree:

Yes, and in this other land of rocks and in this other land of rocks and rills and vast prairies and craggy

The trees in spring are always ready with their welcome. This warm welcome expressed in through the fields and allotment gardens to Shottery, just as the sun was setting in a red-gold haze. This hamlet is an anyhow place, with ruty ways, high walls and some modern buildings. Shottery was given to the blabopric of Worcester by the Aron meadows seem to have been colonized very early. Shottery was given to the lishopric of Worcester by the Marior is the subspict of the fields and allotment gardens to Shottery, just as the sun me—in that garden-land

Very small and very green, and full of little lanes and all deuse with flowers.

And full of little lanes and all deuse with flowers.

That wind along and lose themselves between many and parks, and fields of quiet sheep.

And in the hamlets where her staidward likes of the fields and allotment gardens to Shottery, just as the sun me—in that garden-land

Very small and very green, and fields of the fields and allotment gardens to Shottery, just as the sun meadows seem to have been colonized to the blabopric of Worcester by offia, King of Mercia, in the eighth century, and had it not been for the self floor and an ancient piece of timber, curving earthwards like in a cottage it in a cottage with a fix in a cottage floor and an ancient piece of timber, curving earthwards like in a sun of the flower flowers.

SCIENCE AND HEALTH and the CHURCH MANUAL

By

MARY BAKER EDDY

THE Trustees under the Will of Mary Baker Eddy have authorized the publication of the prose works of Mrs. Eddy other than "Science and Health with Key to the Scriptures' and the "Church Manual." in one volume, uniform in style with the pocket editions of her writings.

The new book of 1312 pages contains the following books:

Miscellaneous Writings Retrospection and Introspection Unity of Good Pulpit and Press Rudimental Divine Science No and Yes Christian Science versus Message to The Mother Church Message to The Mother Church for 1901 Message to The Mother Church for 1902 Christian Healing The People's Idea of God The First Church of Christ, Scientist, and Miscellany

For the greater convenience of the student, the lines are numbered, as in the textbook and the above titles comprised in the volume are arranged in the order adopted in compiling the "Concordasce to Other Writings."

Pocket edition, size 4%x6% x1% inches, printed on Oxford India Bible paper, morocco, limp, round corners, gilt edges, single copy \$14.00; six or more, each \$13.50.

MARKET OPINIONS

Hayden, Stone & Co., Boston: As a whole, business holds up well, with the market still far in the lead. The stock market has indeed gone to such lengths that we feel it has reached rather a critical stage.

F. L. Milliken & Co., Boston: During the past week the market has again made history. On Wednesday evening the Dow, Jones industrial average stood at 128.68, the highest level in history, and exactly three points above the previous high of March 6. The theory that the bull market is over has therefore been riddled, as the break in March is now shown to have been a reaction in a bull market.

Schirmer, Atherton & Co., Boston: If we dismiss the surface indications, and get down to the underlying factors under the present speculation, we shall have to conclude that the basis of the rise seems to rest upon the solid ground of easy money for a fairly long period, the prospects for a large volume of business at a fair margin of profit, and the promise of early federal tax reduction. Add to these, the early prospect of funding of the indebtedness of European governments to our own, and the return of normal political and financial conditions in Europe, and we have a set of factors normal political and financial conditions in Europe, and we have a set of factors which are well calculated to fire the imagination of our business men and financiers

Tucker, Bartholomew & Co., Boston: We do not anticipate an early ending to the present disposition of the public to speculate on the up-side and feel that there are plenty of companies whose prospects will be more fully exploited before the bull market culminates.

J. S. Bache & Co., New York: The volume of trade at unprecedented figures for this season of the year continues. Profits may not be large as a rule, but several concerns have announced incearnings statements are shown by some of the motor companies. Large bank mergers are being announced. Some markets, like that in oil, are showing growing strength. All these are indicative of a reasonable amount of prosperimoney and no signs of reaction, holders of good stocks are confident.

Elmer H. Bright & Co., Boston: We believe that the oils, rails and special stocks whose equities have not yet been completely discounted furnish the safest issues for either speculation or investment at the present time.

Richardson, Hill & Co., Boston—Yesterday's run up in call money rates was without effect on the market, due to will be easy for some time to come. There is no change yet in the technical position of the market, and we see no signs of any reaction running beyond a point rr so. The trend is still upward.

General Electric declared the regular quarterly dividends of \$2 on the common and 15 cents on the special stock, payable July 15 to stock of record June 3.

Fure Oil declared the regular quarterly dividend of \$2 on the 8 per cent preferred, \$1.50 on the 6 per cent preferred and \$1.25 on the 654 per cent preferred, all payable July 1 to stock of record June 10.

PACIFIC OIL EARNINGS

Pacific Oil earned \$1.16 a share in
the March 31 quarter, compared with
97 cents in the preceding quarter and
83 cents in the first quarter of 1924,
Surplus for the quarter was \$4,050,199
after depreciation, depletion and federal taxes, compared with \$2,917,074 in
the first quarter of 1924. "We Pay You to Save" NEW YORK, May 23—Vice-President W. L. King of Jones & Laughlin stated orders of his company are increasing. "Things are getting better," he said. Mr. King stated that after the election there was overbuying and overproduction of steel products which has brought about a recession.

We pay 8% dividenda, payable 25 quarterly. Lack of information or your part is our only competitor.

MONEY EASE IS BIG FACTOR IN

again quickly.

Yesterday some shrewd observers thought that the present movement was about over because of the apparent tendency to stimulate buying of issues that ordinarily are not traded in to any great extent. It has been a common observation that when speculation swerved to such stocks, one should expect that the upward movement was about over, or at any rate there would be a good-sized set-back. The accuracy of this observation, so far as yesterday's trading was concerned, was soon upset, as there developed active and aggressive buying in many standard industrials, and particularly in railroad shares.

Hopeful Outlook Prevalls

Hopeful Outlook Prevails Fortunately, those who take a hopeful view of things are in the majority

Fortunately, those who take a hopeful view of things are in the majority in this country. Some of them would like to see greater activity in certain lines of business, but all except the cynics are willing to admit that business as a whole is going forward in a sound way and in larger volume than most observers realize.

This was in substance what Judge E. H. Gary said yesterday at the annual meeting of the American Iron & Steel Institute in this city, and his observations relative to present conditions in business and the outlook for the coming weeks and months were substantiated by informal statements by several other prominent executives of steel manufacturing companies.

Judge Gary generally does not lose an opportunity to express his opinion relative to certain features of Congressional activity which he regards as unfavorable, and to the idea that taxes in this country should be reduced still further. Happily, affairs in Washing-tine, and the way they are being administered by President Coolidge are more passuring than they have been at any time in some years.

Money Ease Striking

Money Ease Striking

When some authorities on the stock market have been asked recently for their opinion as to the chief cause of the activity in stocks, they have replied that probably it was the abundance of money at low rates. This feature of the money market has been striking, in view of the large volume of business in the country generally that is being done, and of the activity in stocks which resulted in a total turnover on the New York Stock Exchange of about 2,000,000 shares on Wednesday and Thursday and a most 2,000,000 again yesterday.

The substantial increase in the excess reserve of the clearing house banks of this city that was disclosed in a statement a week ago today, and the New York Federal Reserve Bank this week, show conclusively the easy credit conditions prevailing. Money Ease Striking

THE CHRISTIAN SCIENCE MONITOR, BOSTON, SATURDAY, MAY 23, 1925 NEW YORK STOCK MARKET RANGE FOR THE WEEK ENDED SATURDAY, MAY 23

GOLD ARRIVES IN LONDON FROM RUSSIA

LONDON. May 23 (49) — Gold valued at £2:000,000, some of it in bars said to bear the United States Government stamp, has just arrived in London from Leningrad, says the Daily Mail. The metal was consigned by the Soviet State Bank and deposited in the Bank of. England to the credit of Aroos, Ltd., the All-Russian Co-operative Society's trading organization. Extreme precautions for secrecy were taken when the gold was unloaded from the Soviet Government steamer Geroen.

Geroen.

The boxes were placed in a motor truck, covered with posters advertising Danish bacon, and taken to the Bank of England vaults under heavy

MARKETS AT A GLANCE COLLEGE TENNIS IN THE FINALS

Foreign exchanges: Steady; trading Julius Sagalowski and Law-Cotton: Higher: firm Liverpool Pence Kurzrock Rutler Unit Higher: firm Liverpool rence Kurzrock, Butler University, Favorites to Win

CHICAGO, May 23—In semifinal singles and doubles battles on the Midway courts here today in the fifteenth annual championship lawn tennis tournament of the Intercollegiate Athletic Association, Butler University is expected to sweep the honors. Julius Sagalowski '25, former United States boy champion and runnerup in the "Big Ten" tourney last year, is favored to win the singles as a result of his performance up to the fourth round.

In doubles, Sagalowski paired with Lawrence Kurzrock '26, Butler is favored to win. In a semifinal match yesterday the Butler pair defeated in easy manner the University of Michigan entries, P. F. Jerome '25, and R. H. Crane '25, 6—1, 6—0. This masterly showing, after both Sagalowski and Kurzrock had battled through two rounds of singles and a previous round of doubles, proved that the Indianapolis boys have the endurance as well as the skill to carry them to the crowns. Other single players in the semifinals today are E. D. Krickbaum '26 of Michigan, the surprise of the tourney, who yesterday eliminated V. R. Hunter '25 of Ohio State University, one of the favorites. He meets Sagalowski today. In a hard three-set battle, Krickbaum outpointed the Buckey, 7—9, 6—4, 7—5.

In the fourth round Krickbaum added to the surprise by eliminating W. M. Goodwillie '25 of University of Minois, who was expected to go to the semifinals at least. His score against the Illini was 7—5, 6—2.

F. W. Donovan '26 of University of Minois, who was expected to go to the semifinals at least. His score against the Illini was 7—5, 6—2.

F. W. Donovan '26 of University of Minois, who was expected to go to the semifinals at least. His core against the Illini was 7—5, 6—2.

F. W. Donovan '26 of University of Minois, who was expected to go to the semifinals at least. His score against the Illini was 7—5; in the third round A. Dorsey '25 of Ilows, 6—2, 7—5; in the third round and J. M. Dorsey '25 of Ilows, 6—3, in the fourth.

Goodwillie and F. A. Earle '26 are expected to win the other semifinal singles battle tod Special from Monitor Bureau

THE PARTY EARLY SET AND SET AN

in Intercollegiate Championship Tourney

PRINCETON, N. J., May 23 (Special)—Although the golf squad of Princeton University has not shown exceptionally team play to date and is not considered a strong contender in the intercollegiate league, it is still conceded a very good chance in the final intercollegiate championship matches which will be held at the Montclair Golf Club.

On the whole, if team scores only are considered, the Princeton men have had a rather poor season so far, having won the matches against Pennsylvania State College and Columbia University only and met with defeats at the hands of Harvard, Dartmouth and Williams. The real strength of the team, however, is far strength of the team, however, is far

rength of the team, however, is far sater than its present standing alld indicate. In the matches with Harvard and Dartmouth, two of the strongest squads in eastern collegiate circles this year, Princeton lost by only one point in each case, forcing the play to the end. The victories over Penn State and Columbia were decisive.

The real test of the Tiger strength will come in the match with Yale University today, after which it will easily be seen whether or not the Princeton men have any chance in the intercollegiate championships. With a team composed mostly of star golfers under the leadership of Dexter Cummings 25. Yale has come through the spring undefeated and should have little trouble in conquering the Tigers. the match with Yale Uni-

meeting, however, from the Princeton standpoint, not in the team play, but standpoint, not in the team play, but in the individual scores, for while Princeton has litle hope of winning anything in the league matches, in the intercollegiate championships next week no team score is taken. The title were two big surprises in the preliminaries. S. E. Wilson of the University of Maine, who won the quarters will deal in the college was reliable to the college with the college was made by L. A. Whitney of Dartimouth in 1913 when he threw the discount in 1913 when he threw the disco awarded to the college which turns in the four lowest scores, and it is under this system that the Tigers hope to show up well. The team, as a whole, has been playing erratic golf, but there are several men who play a steady and sometimes brilliant game, in whom much confidence will be placed next week. placed next week.

The outstanding player on the Princeton team is Capt. Burton Mudge Jr. '25, who is well known throughout the middle west. He formerly held the western junior championship and last year was a semifinalist in the national championships. His rec-ord in collegiate golf in past years is exceptionally good, and so far this spring he has been playing a steady, winning game. He has met most of the leading men of other colleges in match play, and has turned in good scores against them. In a practice match at the Merian Cricket Country Club early in the season, Mudge faced M. R. Marston, the national champion in 1923, and forced the match to a close finish. One of his were 3 down and 4 to go. His long markable runner he is. game is especially reliable, his drives and brassie shots always carrying far ever to assemble in the and straight

Hackl Steady Player

Hackl is also a cool and steady player and has been an outstanding factor in all victories this spring. Although he was in Princeton last year, he was ineligible for competition be-cause of the one-year rule, so that this is his first season in intercollegiate golf. He is well known outside college circles, however, as the Chicago district champion in 1923 and as the low qualifier in the first day of the western championships last year. His work this spring has been exceptional, including in it a victory over S. D. Herron, national champion in 1919, who was representing the Merian Cricket Country Club. With Mudge, his play in foursomes has been featured. The feature of Hacki's game is his playing of iron shots in which he follows closely the style of Charless Evans Jr. All the shots are long and clean. His work on and around the greens is also good.

Robert McDougal Jr. '26, who has been playing third man this spring, is another golfer of some reputation, holding the course records of the South Shore Country Club of Chicago and the Gull Lake Country Club of Chicago and circles, however, as the Chicago dis-

Princeton last spring in the national intercollegiate golf tourney and has shown up well this season. He is credited with several victories over l-known golfers, among them, Captain Sargent of the Merian Cricket

Club.

L. E. Hart '26 is the longest driver on the team, using a long, free swing which lends a great deal of power. J. N. Winton '25 and A. D. Parker '26 complete the team which will enter the intercollegiate tourney.

The squad was greatly handicapped by the ineligibility of J. A. Mackintosh '25, an Oxford student now studying at Princeton. Mackintosh was captain of the Oxford team last year and was considered as a possibility

Bowdoin Favorite to Win Team Title

Leads Other Colleges in Num-Expects to Show Up Well ber of Qualifiers for N. E. Intercollegiate Finals

> N. E. I. A. A. QUALIFIERS faine Brown Holy Cross. Williams ...

Bowdoin College enters the finals of the thirty-ninth annual track and field championship meet of the New England Intercollegiate Athletic Association a favorite to capture the team championship which it lost to Boston College last year by 11/2 points, as the result of the preliminary events held on Tech Field yesterday afternoon. Bowdoin led the 1.8 other colleges which placed men for the finals with a total of 15. University of Maine sprang a surprise by qualifying 13 and Massachusetts Institute of Techogy placed third with 12. Brown University, Holy Cross College and Williams College promise to be factors in today's finals as they are only four and five men respectively behind Bow-doin in representatives.

One new association record was es-

tablished in yesterday's trials when Wellington Charles '25 of Bowdoin, Individual Scores Watched

Great interest is centered on the neeting, however, from the Princeton tandpoint, not in the team play, but

Wellington Charles 25 of Bowdoin, present shot put and discus champion, qualified for the discus with a throw of 138ft. 11½in. This was one of the oldest records of the association and was made by L. A. Whitney of Dart-

Hampshire, practically unnkown be-fore the meet started, led the qualifiers cuts and lobs. fore the meet started, led the qualifiers in the javelin throw with a throw of

NURMI FAILS TO BREAK RECORD

Runs Fine Mile Considering Conditions Prevailing

That Paavo Nurml of Finland, holder of the present one-mile running record as well as a number of other marks, is capable of breaking his present mark of 4m. 10.4s., for the distance, is the opinion of those who saw him try to establish a new record on the Harvard Stadium track, Boston, last night. At the time conditions nost brilliant showings was made were most unfavorable as there was a against Harvard when he and his strong wind blowing and the temperateam mate, G. F. Hackl Jr. '27, won their foursome after an uphill battle from the fourteenth hole, where they tance in 4m. 15 1-5s., shows what a re-

The greatest gathering of spectators ever to assemble in the United States to watch a track meet was on hand to cheer the Olympic star, and he was given a fine reception. Something like 35,000 persons were in the inclosure and there were many standing at the open end of the Stadium, to say nothing of some who were unable to get into the field. It was a strictly amateur affair, as the Harvard Athetic
Association staged the performance.
everyone being admitted free of charge. Nurmi came from New York

ENGLAND WINS OVER FRANCE IN LAST GAME

LONDON, May 23—The last echo of the 1924-5, international associa-tion football season was silenced yesterday when at Paris England's full eleven defeated that of France 3 goals Apparently the game, coming as it did after a long and arduous campaign, did not produce particularly high class football, England's forwards in particular, showing inefficiency in and was considered as a possibility front of the goal. This was in strong for the Walker cup team which would represent England against the United States. He was victor in the annual tacks. Had they shown anything approaching similar capability in shoot-

The second half, wherein the visitors played with only 10 men, may be divided into two periods—when England attacked persistently, scoring Cannefax, who hung close on the heelstwo goals through the famous Aston Villa winger, A. R. Dorrell, and when Villa winger, A. R. Dorrell, and when the compliment, and when the compliment, while the complement, the complement of the complement.

three Scotch, three British, three Amerlean and two Canadian national crowns.

YALE'S TENNIS RECORD BRIGHT

Has Not Yet Lost to College Team This Spring

NEW HAVEN, Conn., May 23 (Special)—The annual match with Harvard University today is the only intervening obstacle between the Yale University tennis team and another "Big Three" championship, as Princeton, with an undefeated galaxy of stars, was defeated, 5 matches to 4, a week ago. From all reports, the Orange and Black was represented by one of its strongest combinations in seasons, and the victory over them stamps the Blue as a formidable aggregation and one which formidable aggregation and one which the Crimson will be compelled to go at

top speed to defeat.
Since the beginning of the year, the court game of the New Haven institution has been marked by a con-tinued series of improvements, the unsuccessful southern trip during Easter vacation being the only reerse on an otherwise fine Eli record. Although not vanquished by a college team during the tour, the poor show-ing is explained in a large part due to the lack of practice and to ab-sence of the three stars of the team. However, the experience gained in meeting such worthy adversaries has been the basis for the later developbeen the basis for the later develop-ment that has resulted in a record that is not blemished by a loss to any college team. Williams College, Uni-versity of Pennsylvania, Columbia University, the United States Military Academy. Wesleyan University, the United States Naval Academy, and Princeton are numbered among the victims of Yale.

United States Naval Academy, and Princeton are numbered among the victims of Yale.

The outstanding star of the squad is A. W. Jones '25, who has been captain for two years, and who this season is performing better than ever. An indication of Captain Jones' strength is the comparatively easy fshion in which he defeated Capt, Jerome Lang '25 of Columbia. Jones is a former United States junior champion, and for two years runner-up in rersity of Maine, who won the quarter-mile dash in the Maine State intercollegiates last week in 49 4-5s., failed to qualify in a heat which was won in 51 1-5s. R. H. Evans of New is a former United States junior cham-pion, and for two years runner-up in

Watson Second Man

Next to Jones comes Charles Watson d'27, who has consistently defeated his opponents thus far this season. Watson was captain of the 1927 team Watson was captain of the 1927 team and the following summer was a member of the combined Harvard-Yale team that journeyed abroad and met Oxford and Cambridge. He is a cool. resourceful player along the style of Jones and from his past performances is picked by undergraduate tennis devotees as next year's captain, although only a sonhomore.

In contrast to these two players, A Hopkins '25 employs a driving ashing game. F. B. McGlinn '27 and Hopkins are considered about on a par. Other members of the team are par. Other members of the team are F. F. Symington '26, captain of his freshman group; R. D. Newell '25, and K. V. Jackson '27. The substitutes include R. M. Thalheimer '25, Henry Lanier Jr. '25 and E. T. Merrick '27. In the doubles Jones and Watson are by all odds the strongest pair. Hopkins and McGlinn form the second doubles combination and Symington and Newell have been playing as the and Newell have been playing as the

Two for Intercollegiates

Following the match with the Crimson, Yale will point for the Intercolle-giates to be held the last part of June. The Blue's main aspirants are Jones and Watson and the former should make the best showing that he has yet

NEW YORK, May 23—W. F. Hoppe enters today into the final block of his 60 point three-cushion billiards match against R. L. Cannefax, national champion, with a slightly decreased lead as the result of yesterday's play at the Strand Academy, though still more than 100 points ahead, the score being 500 to 384, in 502 innings.

Cannefax displayed his finest play of the season yesterday evening, and, as a result, won the block, his second of the match, 63 to 50, in 54 innings. He finished his 50 in 40 innings, and elected to gain as much as he could last year. elected to gain as much as ne could before Hoppe should reach that point. Hoppe's score then stood at 30, but he managed to gain the next 20 points in 14 more innings, ending the block. Hoppe made the high run of the game proaching similar capability in shooting they would have led at half time in his second inning, seven, while Cannefax replied with six shortly afterward, and, taking the lead, held it to

MARSHALL AMONG THE MARIENBAD WINNERS

MARIENBAD, Czechosjovakia, May 23 (P)—F. J. Marshall, United States champion, was among the winners in the second round of the international chess tournament played here yester-day. Carlos Torre of New York drew his game. A. K. Rubinstein of Poland won his second game in succession

and now neads the list of players. The summary:

YALE FRESHMEN BEAT HARVARD

NEW HAVEN, Conn., May 23—Harvard's freshman track and field team lost to Yale's 1928 team by the small margin of two points, here, yesterday afternoon, the score being 68½ to 66½. Harvard gave the Elis even closer competition than expected.

The Crimson yearlings won nine out of 15 possible first places, but the Elis scored heavier in seconds and thirds. The double-winners for Harvard were Burns in the 100 and 220-

vard were Burns in the 100 and 220-yard dashes, Pratt in the hammer and discus, Captain O'Neill in the 440 and half-mile, and Luttman in the mile and two-mile runs. Captain Carr of Yale was high scorer

for Yale, with 11 points made up from firsts in the pole vault and javelin, and a third in the discus. Yale had no other double winners.

Pratt of Harvard was the high

scorer for the meet with 14 points, scored by two firsts, one second, and one third. Harvard took first in every track event save the hurdles, from the 100-yard to the two-mile run. The

100-yard to the two-mile run. The summary:

Harvard Twelve Is Out to Beat Yale

1804—Yale
1920—Harvard
1921—Yale
1922—Yale
1923—Yale
1924—Yale

Harvard's varsity lacrosse team left this morning at 10 o'clock for New Haven, where it meets Yale Univer-sity in the final game of the season. Eighteen men under the care of Coach B. Lydecker, former Syracuse Uniersity star, and Manager C. T. Crosby 5. Coach Lydecker is confident that '25. Coach Lydecker is confident the his 12 will defeat the Eli stickmen. The Crimson record this season war-rants a victory over the Yale team, having won six of its seven games, losing only to Syracuse, 3 to 1. Yale has won four, lost three and tied one.

The Blue unquestionably had a harder schedule, but lost the hard games, particularly to the United States

Harvard has played Yale at lacrosse seven times over a period of 41 years, and only once have the Crimson players scored a victory, that being in 1920. The first clash took place in 1883, when Yale triumphed. 2 to 1, and repeated in 1884. Harvard continued playing the game until 1889, but Yale did not have any teams during this period. From 1889 to 1894 Harvard discontinued lacrosse because of lack of finance, but resumed playing lack of finance, but resumed playing in that year. During the triumphant years of lacrosse at Harvard, particularly when its teams were winners of the Intercollegiate Lacrosse League, Yale was not encouraging the sport. However, the Blue resumed the game against Harvard in 1920, and lost for the only time to the Crimson by a score of 4 to 3. Since that time Yale has won annually, although it was forced into overtime to win, 3 to 2,

BOWDOIN WINS TITLE LEWISTON, Me., May 22—Bowdoin College made a clean sweep of the championship singles and doubles in the Maine Intercollegiate lawn tennis tournament which ended yesterday. The playing of P. H. Lord '25 and D. M. Hill Jr. '27 as teammates and as opponents in the finals, won by Hill, was the outstanding feature.

KENT FACES THE CHAMPION SIDE

This Will Be the First Real Test of Their Mettle in County Cricket

LONDON, May 23 — The English county cricket matches, which came to an end yesterday and the day before, have failed to necessitate any alteration to the top end of the standing where Kent, Surrey and Yorkshire still rejoice in possession of 100 per cent. Of these 100 per cent cricketers, the By Cable from Monitor Bureau the race

The real test of their mettle begins today when Kent opposes the champion Yorkshire team, and Surrey meets Essex. Whatever may happen to Surrey, the result of the other class is bound to reduce the number of 100 percenters by at least one. Essex will enter upon the battle at Leyton with confidence, derived from its good showing in three previous matches. Yesterday this county, which a few Yesterday this county, which a few Yesterday this county, which a few showing in three previous matches. Yesterday this county, which a few months ago seemed likely to drop out of first class cricket altogether, gained a well-merited win over Gloucestership by five wickets, and for this it had largely to thank A. C. Russell. Who, batting at his best, scored 135 out of 250 in the home side's second After Gloucester had seeved.

Essex 222 on their first innings, the former profited by some lapses in its opponent's fielding to hit up 291. One hundred fifteen of these came from the bat of W. R. Bloodworth. Essex then required 246 runs to win, and set about the task of obtaining them in a de-liberate manner that has been charac-teristic of their play all season. Rus-sell, who might have been caught before he entered double figures—he gave a simple looking chance when he had made only three—mastered the bowling thoroughly, receiving valuable assistance from Capt. J. W. H. T. Doug-las. Percy Perrin and Arthur Hipkin, and all runs necessary were scored for the loss of five wickets.

Lancashire's great bowling strength enabled it to do what few counties have ever done, and only one, Sussex. has done it since the war—win a June 1. championship match in one day. This game took place at Manchester, a spot notorious for rain, and the wicket WING was impossible from a batting point of view. Somersetshire went in first and made 74, to which the home side replied with 130. C. H. Parkin and E. A. MacDonald had matters just as much their own way in the visitors' second innings, which terminated for one run less than the first, and Lancashire therefore stood in need of only 17 runs when it batted the second time. The Lancastrians lost one bats-man getting them, and so won by nine wickets.

nine wickets.

Surrey's match with Warwickshire,
won by the same margin, was remarkable chiefly for the good batting of
J. B. Hobbs and Andrew Sandman, who scored 120 and 181, respectively less than, nine runs apiece. The team scores were Surrey, 442 and 58 for one wicket. Warwickshire 209 and 290 The top score for the losers was 76 by W. G. Quaifw in the second knock. Hobb's "Century" was his one hundred and sixteenth in first-class cricket and brought him to within 10 of W. G. Grace's record. Both Yorkshire and Sussex were op-

posed to weak sides, the former de-feating Derbyshire by an innings and 160 runs, and the latter defeated Glamorganshire by 326. After the champions had made 330 for seven wickets declared, the Derbyshire representatives were never in the picwickets in the first venture, which realized only 61, and in the second when they made 109 it was A. S. A. Waddington who most discomfited them. The remarkable bowling by that hero of the test matches in Australia M. W. Tate, enabled Sussex to register its first championship victory.
He took 14 wickets for 58 runs, and, almost single handed, skettled out the Welshmen for 41 and 79. The winners

totals were 227 and 219.

A good century apiece by Capt. C.
H. Taylor and G. B. Leggeman, who had not figured prominently before in big cricket, were the outstanding features of Oxford University's game against Worcestershire. As the varsity scored 364 and 272 and Worcester 379 and 194 for nine wickets, it will be seen that the latter just staved off defeat at the end of a close game. R. J. O. Meyer, who took 13 Leicestershire wickets for 65 runs had a big hand in the Cambridge University win by 106. The scores Cambridge 200 and

ATLANTIC CITY TO BE SCENE OF TRACK MEET

PRINCETON, N. J., May 23—Dr. C. W. Kennedy, chairman of the Princeton Board of Athletic Control, announced yesterday that by agreement between Cornell, Princeton and the Atlantic City authorities, the track meet with Oxford and Cambridge will be held at Atlantic City Saturday, July 18.

The four-lap track at Atlantic City is being placed in tiptop shape for the meet, and stands will be available for 15,000 spectators. The number of

15,000 spectators. The number of seats will be increased if the demand warrants. A large fenced-in parking area adjoining the track will furnish auto parking space for all who come

The Oxford, Cambridge, Cornell, Princeton teams will all train at Princeton for the week preceding the meet, going down to Atlantic City together on the day of the contests. The Princeton men will return here July 1 to get in shape for the meet, and will be joined by the others later. AMERICAN LEAGUE

PRINCETON WINS AT TENNIS PRINCETON, N. J. May 23—Princeton University easily defeated Pennsylvania State College tennis team here yesterday, 6 to 2. C. E. Geuther of Penn State won the only singles match captured by the Nittany Lions, and also assisted to take the doubles match.

Pennsylvania Wins Child's Cup Races

Special from Monitor Burea NEW TORK, May 23—The crews of University of Pennsylvania made a clean sweep of the rowing races with Princeton University and Columbia University on the Harlem River this morning. Princeton was second in the varsity race for the Child's Cup, and in the freshman race, but did not enter a 150-pound crew, Columbia was a bad

of these 100 per cent cricketers, the men of Kent have not been in action during the last few days—they have played only one game to date—and both Surrey and Yorkshire have encountered some of their weaker foes it is too early to view them as having any significant advantage in the race.

the middle course, swung over to the outside and soon had open water between the rudder of the shell and the bow of Princeton. Princeton speeded up, but the steady swing of Pennsylvapia pulled the boat still further ahead, and at the finish the Schuylkill oarsmen were two lengths to the good. The time was 8m. 23s. Princeton's time was 8m. 29s., while Columbia, nine was 8m. 29s., while Columbia

PHILADELPHIA, Pa., May 23 (AP) -After practically being out of row-ing since 1923, W. M. Hoover, former Duluth Boat Club star and 1922 Dia mond Sculls champion, late yesterday won the Philadelphia gold challenge cup final trial on the Schuylkill River. Hoover, by his one-length victory over a field that included W. E. Gar-rett Gilmore, Bachelors' Barge Club; P. V. Costello, Penn Athletic Club, and John Blessing Jr., Undine Barge Club all of this city, earned the right to be sent to England to race John Beres-ford Jr. Olympic sculling champion and holder of the gold challenge cup. The former Duluth oarsman wears Undine colors, beat Gil-1924 Olympic finalist, by one over the 1%-mile course in length over the 14-mile course ... 8m. 13%s. Hoover will sail for England about

HARVARD WINS AT GOLF

INCHESTER, Mass., May 23—Hard University and Dartmouth College teams met yesterday afternoon a Winchester Country Club links. Afthe six singles matches and the three foursomes were completed Crimson was still unbeaten for th son, winning five matches to four.

EDITORIALS

There has been elaborated in Europe a pact which it is hoped will bring permanent peace between the Western nations. The pact has

Four Views of the Peace Pact

taken many forms. In 1919 it was a triple pact between France, America, and England. In 1922 it became a Franco-British pact, which collapsed at Cannes. Then

it resolved itself into a general pact of mutual assistance which was fashioned at Geneva. In turn this gave way to the protocol, which was also rejected. Then there was talk of regional pacts, and these pacts have been put forward in various shapes. There is revived the idea of a Franco-British pact. There is adumbrated, above all, a Franco-German pact. One or other of these proposals-either a Franco-British agreement or a Franco-German agreement-is now accepted as the basis of any European accord.

But there are a dozen variations of this theme. Sometimes a pact between two countries is suggested; sometimes three; then Belgium is brought in as fourth party; Italy also would like to be included; Poland becomes alarmed at finding it is omitted; and members of the Little Entente wonder whether they, too, should not come in. But, after all, the pact, whether it is confined to three powers or is extended to seven, or even nine, chiefly concerns four countries, and the views of those four countries - Germany, France, England, Poland - should therefore be carefully considered.

Germany is now anxious-of this there can be no doubt-to sign a convention with France by which the age-long feud will be brought to an end. She is tired of being regarded by the world as a guilty and an aggressive nation. Germany has been ostracized and feels keenly its exclusion from the concert of Europe. Germany, as it has been picturesquely put, wishes to re-enter the White Man's Club. Therefore it is prepared to give a fresh undertaking to respect the French frontiers; to renounce forever any claims to Alsace-Lorraine; to observe the clauses of the Treaty which call for the demilitarization of Rhineland; and, generally, to forget its ancient quarrel. The sincerity of Germany can hardly be called into question, but the problem of the Germano-Polish frontiers is not finally settled by this proffered pact.

The attitude of France is scarcely well defined. France cannot reject the German offer, but it is suspicious of a trap. It argues that a new document would add nothing to the Versailles Treaty, and in so far as it omitted part of the Versailles Treaty, would tend to weaken the 1919 arrangements. It sees that the voluntary signature of Germany would be better than the forced signature of Germany, but at the same time it remarks that if Poland, too, does not receive the fullest guarantees, then it is because Germany has designs on Poland. Should Germany eventually obtain a diplomatic or a military triumph over Poland, France fears that in its turn it would be attacked. Moreover, France leans rather toward the idea of a formal Franco-British alliance. It remembers, too, its policy of creating a network of alliances in central Europe which are frankly hostile to Germany. In any case, it demands a real disarmament of Germany and the preliminary entry of Germany into the League of Nations. Nevertheless, in spite of these criticisms, France may be induced to favor a rap-

3. England, on its side, has abandoned the diplomatic tradition that safety is to be found in a Balance of Powers on the Continent. It no longer believes that by keeping France and Germany apart it will be able to sway events. It is quite prepared to assist in promoting a friendship between France and Germany. It is prepared even to give some kind of pledge for the diplomatic preservation of the status quo as between France and Germany, but it is not prepared to make promises which might involve it in a dispute between Germany and Poland. England will make sacrifices to assure peace, but it will not engage its army or its navy in causes which may not at a given moment appear to be worth fighting for. It regards many of the alliances of the Continent as more likely to produce war than to assure

prochement with Germany.

4. Poland has made its voice heard. It has reminded France that there exist special liens which would compel France to support Poland. It would look askance at any Franco-German accord to which England and other countries might adhere, because such an accord would appear to be a desertion of Poland. It would denounce, in other words, a Franco-German peace made at its expense. It would reproach France with sacrificing the interests of its friends. It proclaims that its omission would be equivalent to an invitation to Germany to seek the revision of the eastern frontiers and of arrangements in regard to the Polish corridor to Danzig.

Such is the position of the chief parties to this diplomatic discussion. This analysis has been made as frankly as it is possible to make it, because it would be idle to disguise the difficulties which stand in the way of an all-round acceptation of a suitable pact. Yet the difficulties are not insurmountable, and it is the business of the diplomatists to reconcile the four points of view which now appear to be divergent. One can see the possibility of a satisfactory compromise. It would be well to proceed cautiously, but there is undoubtedly much which is encouraging in the situation, inasmuch as all the countries concerned are facing the facts and are pressing their case somewhat deprecatingly, asserting that their sole desire is to

arrive at an acceptable conclusion. That there should be conversations of this character is in itself a hopeful sign. If it is premature to declare that a pact is certain, at any rate, one sees the problem far more clearly than ever before, and one realizes that the manner in which it is approached is conciliatory. At least one can without the smallest exaggeration say that the prospects were never brighter.

Now that large sums of public money have been advanced for the development of irrigation

projects in the semi-arid agricultural sections of the western reas of the United States, the problem appears to be, according to Secretary of the Interior Work, to keep farmers on the

projects upon which they have settled. Eventually, according to the plan agreed upon for financing these undertakings, the cost of improvements, as well as the cost of maintenance, is to be paid by the settlers, who, in taking up their claims, bind themselves not only to pay a nominal price per acre for the land, but to pay, for a term of years, or perpetually, a fixed sum per acre for the use of water furnished from a central distributing reservoir.

Secretary Work, whose view is supported by Dr. Elwood Mead, Commissioner of Reclamation, finds that the present tendency on the part of many of the farmers who have sought to improve these projects is to abandon them, thus allowing whatever loss may be entailed to fall upon the Government. He makes it quite plain that the development of new irrigation projects will not be recommended by his department until there is apparent a more encouraging disposition to utilize those that have already been provided. With work on some uncompleted projects still under way, it is estimated that the revenues derived from successful enterprises now in operaton, as well as all funds appropriated by the Government, will be needed during the next decade to make these available for settlement.

It is not insisted, even by the unsuccessful settlers upon these reclaimed lands, so far as the fact appears, that the rates levied for the use of water are too high, or higher than they should be if it is necessary for the users to pay the actual expense incurred. And yet, with this annual charge adjusted as fairly as has been found possible, discouraged farmers are leaving lands partly improved and houses practically completed, and others have thus far failed to take their places. It has been made apparent that while the reclamation service can build irrigation dams and dig ditches, it cannot draft settlers and compel them to pay for the reclaimed lands, or even induce them to occupy them, until a way has been found to reward them, even meagerly, for their expenditure of time and labor.

Possibly the solution of the problem which naturally presents itself is the adoption of a policy which would provide for the payment of water taxes based upon gross or net production, rather than upon the acre-feet of water used. The plight of the irrigation project farmer of today is not greatly different from that of the homesteader of a former day who described his position as that of one betting his time and \$1.50 an acre against the Government's quarter section of land, that he could remain on it, and subsist, until the time came to "prove up." But the man who had the choice of a farm site in the days when the rich and abundantly watered prairie country stretched for unnumbered miles across plains and valleys, got much the best of the bargain, compared with the toiler who, while unfamiliar with the methods of irrigation, attempts to make a crop on the deserts of New Mexico, Arizona or Nevada. If a subsidy of any kind is to be granted the farmers anywhere, it should go to those who have tried, as yet unsuccessfully, to reclaim these waste places. '

Interesting attention has from time to time been directed to the fact that American trans-

The Hiatus in Transcontinental Trips

continental tourists, or, for that matter, all travelers who journey from east to west or from west to east through the gateway of Chicago, are compelled to change trains in that city. The same is true of St. Louis.

if by choice or chance their route lies through the latter. This entails an unavoidable loss of time. Thus the Boston or New York business man, willing to pay the extra fare demanded upon so-called limited trains, that he may make the best possible time, loses in these transfers as much or more time than the faster train has enabled him to save theoretically.

This arrangement, which compels a transfer from station to station or from train to train, or, more correctly, the lack of provisions which would make such transshipment unnecessary, has existed ever since the first railroads carried passengers into and out of Chicago and St. Louis. These cities are, in fact, gateways. There is no passing through them as one passes through New York, even, or through Philadelphia, Washington, Kansas City or Denver. An unwillingly conceded toll of time, if not of money, is exacted from each and every brief sojourner. In Chicago, it is true, transportation between stations is provided by the railroads and paid for, presumably, by the holders of through tickets. In St. Louis, where all trains enter and depart from one station, the delayed traveler has the choice of remaining in the station or at the hotel operated in connection therewith, or of seeing the sights about town.

The possibility of eliminating these delays has long been discussed. Among the managers of trunk railroads, east and west, an arrangement by which through coaches might be transferred, in solid trains, through the gateways has been regarded not only as practicable, but easily possible by such an arrangement of tracks at Chicago as is now resorted to in carrying trains around or south of the center of Buffalo. In St. Louis it would not be necessary to build an additional mile of new tracks. Trains now entering the city from the east are. after entering Union Station, already headed

for the west. It is true, of course, that the railroads serving these two important terminals from either direction are, at least nominally, controlled under different ownerships. But this fact should not preclude the consummation of a working and operating agreement which would include the transfer of trains, just as at present a traffic agreement makes it possible for the traveler to be routed from coast to coast upon a single

ticket. That this arrangement never has been made is in no way convincing that it should not be made now. Never before in the history of American railroading has through travel been as heavy as in recent years. It may be apparent at present to the owners and managers of east west-bound railroads that the tendency of Atlantic coast travel is more and more toward north and south, and that any facility that would have the effect of attracting larger numbers of travelers to their lines might be worthy of consideration.

It is characteristic of everyone that when a journey is undertaken, be it long or short, any unnecessary hiatus or delay is not relished. Not all of us find it necessary to travel on extrafare trains, but even the most casual sojourner, like Helen's babies, likes to "see the wheels go round." The objective point at journey's end is the spot of greatest desire. Way stations, no matter how large, or picturesque, or imposing, add little charm to the landscape.

Money might no doubt be assigned to musical causes with greater discrimination than it was

Enterprise

in Music and

Its Reward

by vote of the Carnegie Corporation trustees in New York the other day. Why should \$7500, somebody will ask, be given to an organization like the National Association of Schools of Music and Allied Arts,

which scarcely exists, except under a man's hat? Why should part of \$15,000 go for music scholarships in Rome, and \$1500 for expenses incurred by a committee in sending students off to Fontainebleau? Why should not all the thousands be spent in the United States?

Again, question will be raised as to why the bestowals favor music on the conservative and academic side so much more than on the progressive and practical. Granted that the beneficiaries of the corporation must be institutions of a more or less educational type, why should radical and advanced ideas receive only the recognition of a \$7500 gift to the People's Chorus of New York, and a \$5000 gift to the New York Music Week Association? Strange that none of the forward movements in composition, which are the real hope of an original, in distinction from an imitative American art, should be encouraged! Strange, too, that opera, a branch that is perhaps the most desperately undeveloped of any in the country, should be ignored! Worse still, chamber music, which, makes so large a return in proportion to the amount of the investment, has been left out!

But lest exclamation proceed too far, let those who object to the awards think of the opportunity awaiting them the next time. Let them ponder the case of Bryn Mawr College, which receives \$10,000 for its music division. Long ago, Bryn Mawr people, aware that they must let music have a chance if their college was to hold the high place it had gained in general esteem, established a department with a scant fund, and then started a search for a plentiful one. Last winter, they were courageous enough to assist in setting before the New York public a series of afternoon concerts in a hotel ballroom. Then let objectors consider the People's Chorus of New York. Its supporters have worked with an ardor that no discouragement chilled, to keep community singing, which arose in wartime, active. Finally, let them take note of the New York Music Week Association. Nobody knows what Music Week amounts to. Nothing has been proved about it, except that it exists and flourishes, thanks to a few persons ose faith and energy, it would seem, it is impossible to weaken.

So there the matter seems to stand. If representatives of the forward movement in composition, if those anxious for the realization of an American form of opera, and if those who entertain a zeal for the promotion of chamber music, feel slighted, they may need only to be a little more enthusiastically poor for awhile to become, through Carnegie money or perchance other benefaction, effectively rich.

Editorial Notes

Although a certain judge of a probate court in Massachusetts has the reputation for outspokenness on all subjects, this does not mean that every conclusion he draws must necessarily be infallible. Thus when, on a question being asked regarding a testator's alleged eccentricity of dress, he is quoted as having declared: "That is absolutely no evidence of unsoundness of mind; if the clothes a person wears is evidence of her insanity, then all the girls of today are crazy," all that he was really doing was setting up his own standard of what is correct in dress against what the fashions of the day decree. And this is a dangerous course to follow, for it is all merely a question of "relativity." Those who look upon present-day habits and fashions as being greatly inferior to those of their youth might to advantage ponder Cowper's words in "The Task":

> Such dupes are men to custom, and so prone To reverence what is ancient and can plead A course of long observance for its use, That even servitude, the worst of ills. Because delivered down from sire to son, Is kept and guarded as a sacred thing!

That all military French aircraft are now officially referred to as avions, the generic term for heavier-than-air machines of all types, must have been some satisfaction to Clément Ader, now generally regarded in France as having been the "father of aviation." For his "Avion" was the flying machine which in 1897 is said to have flown about 300 yards in the presence of representatives of the French Ministry of This was not the first airplane he had built, however, for he had been at work upon flying machines since 1886. After his 1897 demonstration he placed his plans at the service of the Government, but his machine had not inspired sufficient confidence, and his offer was refused. So bitter a blow was this refusal to him that he gave up his research work, burned his plans and went into retirement. Nevertheless, recognition for his pioneer work came to him gradually, and last summer he was made a Commander of the Legion of Honor, while his original machine is preserved in the Musée des Arts at Métiers.

The Diary of a Political Pilgrim

FROM A CORRESPONDENT IN LONDON

Among what may be called the more popular grievances of the time none occupies a more prominent place than the supposedly undue "spread" between the prices obtained by the producer and the prices paid by the consumer for the necessaries of life. The middleman is regarded as the arch "profiteer." In older days he took the shape of the railroad companies. Today he is the vaguer person known as the financier or the trust. Somebody gets the difference between producers' and convaguer person known as the financier or the trust. Some-body gets the difference between producers' and con-sumers' prices, and the public, be it consumer or be it producer, wants to know who it is, for it is con-vinced that he is taking far too much.

At the last election Stanley Baldwin promised to appoint a commission to inquire into the rise in food prices in recent times, to detect profiteering if it was taking place, and to make recommendations for the pro-

taking place, and to make recommendations for the pro-

ction of the consumer in the future, The first report of the commission, on bread and meat, olished. It is a considerable document, full of statistics and diagrams and painstaking analysis of the elaborate process whereby wheat produced in the United States and Canada, or beef and mutton grown ath America or Australia, finds its way onto the British breakfast table, day in day out, all the year round.

The whole report is a wonderful testimony to the elaboration and efficiency of the modern world-wide dis-tributive system. But it provides little or no consolation for those who had hoped that an unknown band of profiteers would be revealed, and that prices would fall

as soon as their misdeeds could be stopped.

The commission is inclined to think that here and there excessive profits, or costs which are unduly high may be discovered. But it cannot find anything very sensational. Nor can it suggest any very conclusive way of dealing with those conditions which it does disclose. It declares that trusts exist in the meat trade and it finds a tendency to combination in the wheat-milling

It does not, however, regard trustification as in itself an evil, and it states that combination may lead to economies which, if there is no profiteering, will benefit the consumer. It has been unable to find the superfluous middleman, and it has proved that food prices have fol-lowed very much the same course as all other prices since the war. They are about 80 per cent higher than before the war, a fact which is mainly due to changes in the value of currencies, higher labor, transportation costs

Its only important recommendation is that a permanent food council should be appointed, representative of various interests, which should have no executive powers, but whose duty it should be to watch prices and to detect profiteering whenever it can be recognized, and to warn Parliament accordingly. In a word, the commission thinks that there is nothing very vitally expensive or wrong with the existing system. It indicates, however, that monopolies and near-monopolies are not to be trusted out of sight and that a permanent watchdog should be engaged to keep an eye on their behavior and to bark out loudly if anything suspicious occurs!

The report, no doubt, is a disappointment to many who had been expecting some big results. It has been bitterly attacked by the Labor Party which believes that the whole business of buying and importing foodstuffs should be done by the Government as it was during the war and that great economies could be effected thereby.

This recommendation, indeed, is made by the Labor

representative on the commission in a minority report. The majority, however, clearly never seriously contemplated following it. In fact, the difficulties, in peace time, in the way of a course such as it would involve are

the facts and motives which dominate mankind today. There is no short and easy road to any marked improvement. When humanity can overcome some of its national exclusiveness, its passion for money and what money will buy, its preoccupation with laying up provisions for the future in barns and tanks, and can substitute for it the economic teaching of the New Testament, then a more intelligent and a more economical system will be possible. It is in this direction rather than in the region of headhunting for profiteers, though these want watching all the same, that real progress will be made.

Everybody is wondering whether Wembley is going to succeed, for a second year. Those who have studied such situations will tell you that it is difficult to "sell"

such situations will tell you that it is difficult to "sell" an exhibition to the public a second time, because of its insatiable appetite for something "new." But last year the weather was atrocious, and London is said to have hardly visited Wembley at all.

Anyhow the whole exhibition has been polished up, different shows have been provided, lighting effects have made it more gay, and the King and Queen have given it a fresh send-off. Time will show whether the optimists or the pessimists have been the best judges of human nature. The show is certainly worth reeing. One may hope that the public will think so, too. hope that the public will think so, too.

The ceptenary of Thomas Henry Huxley's birth has brought forth a great volume of tribute to the influence he exerted on the religious and scientific thought of Great Britain and indeed of the world. Huxley was the great champion of the "scientific" spirit.

The idea of physical science was first really grasped in the modern world by Lord Bacon. It is responsible for most of the characteristic developments of the modern age. And Huxley was the man who used its discoverles and its methods to attack the orthodox theology of the nineteenth century. His encounters with the bishops were the perennial delight or horror of his time. according to whether the reader was an "evolutionist of what would now be called a "fundamentalist."

Natural science and old theology have now lought out their battle, and the result has been one which the champions of neither expected. Both have been knocked out. Probably nothing would more astonish the great Victorians, if they were to return to earth, than to dis-cover how universal is the conviction in the modern world that natural science, whatever new wonders may still have to unfold, cannot solve the problem which confronts mankind, and that the old theology cannot provide the key which will unlock the door of that spiritual universe, which the roblest and best of humanity

One story is told of Huxley which goes very near to the truth. One day, after an anusually vigorous controversy Huxley turned to his ecclestastical antagonist and said. "You are very sure that you are right and I am wrong. What do you think is the matter with me?" "Well," replied his friend, "I think you are just color-blind, that is all." Huxley is said to have thought a mement and then with his usual honesty, to have remarked, "Perhaps you are right. And if I am, I should not know it."

not know it."

That, of course, was exactly the point. All the wonderful gifts of intellect which enabled him to expose and annihilate the errors of a creedal theology could not in themselves lead him to the comprehension of spiritual values. "The wind bloweth where it listeth, and thou hearest the sound thereof, but canst not tell whence it cometh, and whither it goeth: so is every one that is born of the Spirit.'

time, in the way of a course such as it would involve are immense, while the economies are very problematical.

Thus the whole inquiry leads to very much the same results as many other inquiries instituted in almost every country of the world during recent years. The existing economic system is pretty well the resultant of

The Week in New York

New York, May 23 New York's sidewalk cabarets have about forsaken jazz. Those old familiar strains that used to be puffed into the gloaming on harmonicas from the vantage point of the front steps or a handy lamp post were left at home like a pair of old shoes, foo comfortable to seem elegant, when the city's youthful troubadours fared forth to exchange "blows" for the harmonica championship just awarded. When the din of battle had subsided, it was found that of the five worths who had was found that of the five youths who had won prizes, out of the 5000 who had originally competed, only one, and he the winner of the fifth prize, tried out any of the corner favorites on the judges. "You Gotta See Momma, wheezing off the harmonica manipulated by R. Janevuk brought its thirteen-year-old sponsor a banjo-mandolin. From the other four, on the contrary, there were evidences that their usual cabaret clientele had not consulted, for the offerings included "Orientale," the sextet from "Lucia," Mendelssohn's "Spring Song" and the "National Emblem March." Jazz has long success fully ignored the covered ears of its original enemies, but now with this unkindest blow from its supposed friends it may at last have to temper its shivers and

Being old-fashioned used to be quaint and a little distinctive, but now, with the ceaseless march of new ideas, it has become almost inevitable. Thomas A. Edison who already has invented more than enough new devices an interview here this week that he was at present a work on thirty more: That shows what civilization will do, for Julius Cæsar betame Miles Standish's hero with the now triffing accomplishment of dictating three letters at once! If Mr. Edison would only spend his genius in writing thirty letters at once, instead of devising se new things, it might be his greatest contribution to the joy of living, for at the present rate people are kept uncomfortable trying to get used to their new comforts. The only persons, in fact, who are able to keep abreast of the contrivances of today would seem to be those who do the inventing. + + +

The world's supply of ruins, not including the steady grist from the wheels of progress in New York, seems able enough to keep ahead of the demand. Already the shores of the Mediterranean are dotted with excavators, including five separate expeditions of Americans alone along the Nile, and work has started in the ancient Indian town near Globe, Ariz., yet the discoveries continue. The city of Quiriguia, Guatemala, once a glory of the Mayan empire, is now described by returning travelers as yielding magnificent ruins and offering a new set of hieroglyphics inscrutable enough to make the most sophisticated archæologist a tempting Christmas present With occasional discoveries of this kind, time keeps a fairly even balance with the archæologists, for while experts can uncover in a few years what it took time centuries to conceal, they have to spend decades finding out the meaning of things which it only took months to

Ignorance that was not only blissful but laudable was discovered by Magistrate William F. Farrell this week. Being a magistrate of the traffic court, he not only is a familiar figure, to their sorrow, to many automobilists, but also occupies one of the most widely known offices in the city. Going to it one morning, he hailed a passing in the city. Going to it one morning, he halled a passing taxicab and gave his destination merely as the "Traffic Court." But the driver, though he had been operating in New York for two years, did not know where the court was. Ordinarily, drivers may have their licenses revoked if they are unacquainted with the route to familiar places, but unfamiliarity in this case was such a sign of virtue that it furnished the magistrate with material for a brief homliy when he took his seat on the bench.

4 4 4 David Lochte, president of the national railroads of David Lochte, president of the national railroads of Germany, has just finished a visit to New York, where he has seen how the city gets its extraordinary subway crushes. With all due deference to the inventive genius of Germany, however, it may be doubted that Herr Lochte will ever be able to duplicate these crushes in his own country. He saw, to be sure, the most complete exhibition New York can give when he most complete exhibition New York can give when he most complete exhibition in the control of the cont

Square station and watched how the crowds fit into the square station and watched how the crowds fit into the trains like pieces of a jig-saw puzzle. Such efficient loading, however, was not accomplished by the company alone. It merely furnished steel cars guaranteed not to stretch, and the public, through years of experience, developed the technique. Even the technique, too, probably would not have been developed but for the inexplicable fact that about twice too many persons always seem determined to live in New York.

The senate of elder statesmen of New York, an entirely unconstituted and elastic body to which elec-tions are discovered, not made, has lately been found to include among its number Owen D. Young, who was the include among its number Owen D. Young, who was the principal scene-shifter when the Dawes inquiry was changing the outlook of Europe. He has just received a gold medal from the National Institute of Social Sciences for exceptional services to humanity. This fact alone, however, would not raise him to a place among the city elders except that it served to give further proof that he had the essential qualification of being not only willing, but able, to say something. Probably no two persons would agree on whom all his fellow senators were, unless the list were made long enough to be werth staying off of; though Elihu Root, Chauncey M. Depew, Maj. George Haven Putnam, Judge Elbert H. Gary, former Secretary of State Charles E. Hughes, and George W. Wickersham, the perennial toastmaster, would surely be on it. Mr. Young, though his hair is still conspicuously be on it. Mr. Young, though his hair is still conspic black for such an august group, has already come to wear the same toga with which the eyes of their fellow citi invest these others. America confers no earldoms, as Mr Hughes once pointed out, but it has a way of flattery perhaps even more sincere than imitation, for American will not only go to banquets, but also will pay \$5 to \$10 as well to hear the great ones speak.

An indication that the Americanization campaign is at least proceeding along effective lines came the other day when the American Indian Defense Association staged its annual Indian Day program. Princess Chin-quilla of the Cheyennes and a few other real Americans were present to welcome and help entertain the hundreds of paleface spectators. When the thumping of the tem-toms and the whooping of the braves had quieted down so that people could examine their programs, it was found that the warrior, who had produced the noise and found that the warrior, who had produced atory done the gymnastics most nearly as every good story book says they are done, was not one of those who giving the dance of his fathers, but Julian Harris Se mon, director of the Boy Rangers of the Heckscher Foundation. If Mr. Salomon is a fair sample of the effect of Americanization on the palefaces, the next pla direct the campaign, clearly, will have to be among the

Helping Journalism Out of the Woods

To the Editor of THE CHEISTIAN SCIENCE MONITOR: Please accept my grateful appreciation for the it esting and analytical article of L. N. Flint entitled, the Public Help Journalism Get Out of the Woods?" author pertinently and justly states in part:

When newspapers fall to render to society the things that are society's, they fall because the men who make them are deficient in social consciousness or are incom-petent through lack of education.

However, it is gratifying to note that this state of consciousness is surely, if not speedily, being supplanted by a more enlightened and responsible state of thought. To illustrate: the sincere desire of several newspapers in various localities (including our city), to endeavor to in various localities (including our chy), to the natural relegate "crime news" to oblivion—which is its natural habitat—certainly envisions a new dawn, and of this state of affairs The Christian Science Monitor is the plantage and "page-maker." N. W. Oneer and "pace-maker." Denver. Colo.
